SigmaCERF protects your R&D investment by ensuring researchers can easily create, organize, share and reuse their research records and scientific knowledge. Join the thousands of licensed users across five continents who trust their R&D investment to SigmaCERF including such diverse areas as biotechnology, pharmaceutical, medical devices, engineering, academic and clinical research institutes and government laboratories.

SigmaCERF Supports Your Researchers

SigmaCERF lets users organize their thoughts, ideas and data into the real research story - much as a paper notebook does, but with the benefits of sharing, searching, digital signatures, templates and regulatory compliance!

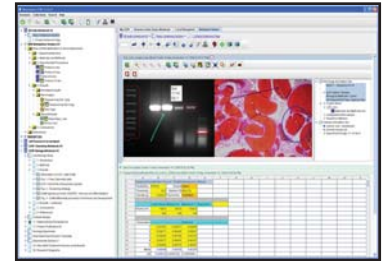

SigmaCERF Supports Compliance

SigmaCERF makes sure that every notebook entry is 21 CFR Part 11 and GxP compliant.

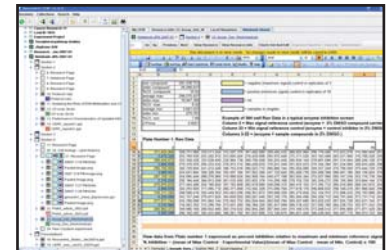

- Audit Trails
- Access Control
- Digital Signatures
- Reporting
- Time Stamps
- Versioning
- Workflow Management
- Standardized Templates

SigmaCERF Supports Your Organizational Stakeholders

IT - A cross platform extensible open system
Legal - Faster regulatory submitting, decreased risk, capture your intellectual properties
Business - Improve productivity, quality and decision making
Research - Reduce time managing data and recording research

Control Vocabularies, Rich Meta Tags and Dynamic Searches makes sure that you can always find your specific data.

Automatically capture data and integrate it into SigmaCERF.

The Electronic Laboratory Notebook for R&D

Pharmaceuticals and Biotechnology Companies

- SigmaCERF provides a Notebook and daily research environment (knowledge desktop) for life scientists and integrates into enterprise information infrastructure
- The SigmaCERF ELN and scientific content management solution serves your needs out of the box, and SigmaCERF is readily tailored to support the scientists' activities and information workflows

Academic Departments, University Labs, and Government Labs

- With support for Windows and Mac OS X, CERF product provides a turnkey solution for labs, departments, or core facilities
- SigmaCERF provides record-keeping (notebook) as well as shared information management and project organization in an adaptable, low-maintenance system designed for diverse users and workgroups
- SigmaCERF provides the secure record-keeping and research collaboration platform needed for an internal department or for research projects distributed across multiple sites and diverse scientific units

Biomedical Facilities

- Easily capture thoughts, data, and analyses to a secure access-controlled 21CFR11 system
- Collaborate quickly and easily with colleagues both locally and globally

Scientific / Engineering R&D

- Capture and display scientific and technical data in an intuitive graphical interface
Automate the approval process for documentation and SOPs

In The LAB

Eliminate Paper Notebooks
Intuitive Graphical User Interface (GUI)
Export Notebooks
Microsoft Office Integration

View Data Inside Notebook
Streamlined Data Acquisition
Forms and Templates

In The Office

Easy to Adopt
Automatic Audit Trails
Metadata Enhanced Searches
Manage SOPs
Manage a Lab from Anywhere
Quality and Consistency

In The Boardroom

Regulatory Compliance
Increase Efficiency
Enhanced Patent Defense
